EXPERIENCE

January 2025 – Present

Frontend Junior Developer - NAOWEE S.A.S

- Developed web interfaces for government platforms using **React**, **Next.js**, and **Tailwind CSS**, applying best practices in responsive design and accessibility.
- Participated in the development of the platform for the **2025 National School Games** (Ministry of Sports), including dynamic forms, input validations, API consumption, and state management using **Redux**.
- Integrated with **PostgreSQL** databases, running simple queries and manipulating data from the frontend; also worked with **Python-based microservices**.
- Actively collaborated with backend, QA, and design teams in **Agile (Scrum)** environments, while also providing **Level 1 and 2 support**.
- Contributed to the maintenance and enhancement of an informative and administrative platform for the **Ministry of Housing (ENTERRITORIO)**, improving load performance and user experience.

May 2023 – November 2024

Web Developer & Content Producer- Kymbo Devs SAS

- Developed landing pages and online stores using **Next.js**, applying **on-page SEO** strategies and performance optimization.
- Created and maintained websites in **WordPress**, including plugin installation, theme configuration, and custom adjustments.
- Produced **digital and audiovisual content** for marketing campaigns in the **retail**, **e-commerce**, **gastronomy**, and **dropshipping** sectors.
- Participated in collaborative projects focused on **responsive design**, **UI/UX best practices**, and version control using **Git/GitHub**.
